Summary

A passionate computer science fresh graduate with a keen interest in web development. I have a passion for web design, particularly front-end, and I am enthusiastic about improving various websites to enhance user experience. My goal is to create innovative and responsive websites that cater to all devices, providing users with a wonderful, easy, and fast experience. I have experience using HTML, CSS, and JavaScript, and I am eager to enhance my skills by learning a framework such as React.js or Angular.js. I have worked on various projects, including corporate websites, real estate platforms, and e-commerce sites.

Experience

ITI|

ITI| | cairo

Front End Trainer | 07/2023 - 08/2023

I was an intern at iti in the field of front end. It was for a month, with 120 hours, and it was about mastering technology such as HTML, CSS, and JavaScript. I mastered creating front-end interfaces using HTML, CSS, and JS, where I created many projects such as e-commerce, clinics, and restaurants. One of the most important projects is the graduation project, where I built and redesigned a furniture website.
